

Medical Researcher, Epidemiology (Multiple Openings) sought by Valley Health Team, Inc. in Fresno, CA.

Duties: Conduct research to investigate, analyze and describe factors that influence the development of disease, disability, and other health outcomes for the vulnerable populations served by VHT. Utilize support tools and clinical research to identify trends, burdens of illness, and variations in the effectiveness of care delivered. Coordinate and study disease states, preventative methods, and medical treatments. Based on study findings, formulate means for prevention and control of a variety of diseases, in both research and clinical settings. Educate healthcare workers, patients, and the public about infectious and communicable diseases, including disease transmission and prevention. Assist in the development of tools to effectively and efficiently manage subsets of patient populations.

Requirements: Doctorate degree (Ph.D. or M.D.) or equivalent in medical sciences, epidemiology, biotechnology or related health sciences field plus 1 (one) year research experience including designing and managing biomedical or clinical studies, developing biomedical or clinical research protocols and methodologies, and presenting and integrating study findings. May travel to VHT offices as needed.

Send resume to: Sukhvinder Sihan, Director of Human Resources, 21890 Colorado Avenue, San Joaquin, CA 93660
